## Our History

In 1990, Chairman of the Board and CEO, Raul Mendoza, envisioned a company providing streamlined solutions to the federal government and their prime contractors. Through a steadfastness towards customers and with innovative solutions, the vision became a reality.

TMA has developed into a diverse business offering clients premium services in engineering, manufacturing, logistics management, and technical personnel services. Within our first 10 years, we had recognized steady growth with sales increasing over 30% per year.

### We contribute our growth to 2 key factors:

- We listen to and understand our Customer's requirements and are committed to performing.
- We invest in quality people who are committed to leading TMA to success.

## About us Today

TMA is a Texas corporation with its corporate headquarters and manufacturing facilities located in San Antonio. We have additional locations at:

Sheppard AFB, TX • Travis AFB, CA • Aurora, CO  
Wright-Pat AFB, OH • West Paterson, NJ

## Manufacturing & Engineering

Using the latest technologies, the Manufacturing and Engineering Services (MES) Division solves obsolescence and performance issues by designing or modifying electrical and mechanical support equipment systems, subsystems, assemblies, components and related software including data acquisition systems and instrumentation to meet unique customer requirements.

### Our service offering includes:

- Engineering & Design of Electrical and Mechanical Products
  - Automated Test Systems
  - Electrical Component Test Systems
  - Avionic Test Systems
  - Jet Engine Test Systems
  - Hydraulic Test Systems
  - Pneumatic Test Systems
- Manufacture, Assembly, Repair and Test of various Electrical, Electronic and Mechanical Items
- Wiring Harnesses
- Cables (Including Nuclear Hardened)
- Integrated Circuit Card Assemblies

TMA uses ISO 9001 compliant and in-house test/inspection procedures to supply you with QUALITY items and product. Our MES Division provides an array of services that will meet your cost, schedule and performance needs. In of our programs and projects, TMA has received high commendation and positive evaluation. Using a well-founded management structure, TMA effectively utilizes quality control and assurance programs with checks-and-balances to ensure the efficient delivery of service support at satellite locations.

## Technical Support Services

Our Technical Support Services (TSS) Division provides an array of services that will meet your cost, schedule and performance needs. We thrive on situations where you need specialized help with the confidence it will get done right the first time. In all of our programs and projects, TMA has received high commendation and positive evaluation. Using a well-founded management structure, TMA effectively utilizes quality control and assurance programs with checks-and-balances to ensure the efficient delivery of service support at satellite locations.
